### **DETAILED ACTION**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: Claims 15-23 are withdrawn from consideration per applicant's response to election/restriction filed on 3/21/2005.

### **Response to Amendments**

Applicant's amendment filed on 9/6/05 has been considered and entered.

### ***Specification***

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Allowable Subject Matter***

Claims 1-14 and 24-31 are allowable.

The following is an examiner's statement of reasons for allowance: Claim 1 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed interface chip to chip comprising, among other limitations, a novel and unobvious limitation of "third level in response to receiving an even number of consecutive logic highs in the data signal and at a fourth level in response to receiving an even number of consecutive logic lows in

the data signal” structurally and functionally interconnected with other limitations in the manner as cited in claims 2-10.

Claim 11 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed interface chip to chip comprising, among other limitations, a novel and unobvious limitation of “a fourth reference level at a fourth edge of the clock signal in response to no change in the data signal if the encoded signal was at the second reference level; and a receiver configured to receive the encoded signal” structurally and functionally interconnected with other limitations in the manner as cited in claims 12-14.

Claim 24 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed interface chip to chip comprising, among other limitations, a novel and unobvious limitation of “recreate the clock signal and obtain data from the double data rate data signal” structurally and functionally interconnected with other limitations in the manner as cited in claim.

Claim 25 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed interface chip to chip comprising, among other limitations, a novel and unobvious limitation of “third level in response to receiving an even number of consecutive logic highs in the data signal and at a fourth level in response to receiving an even number of consecutive logic lows in the data signal” structurally and functionally interconnected with other limitations in the manner as cited in claim.

Claim 26 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed interface chip to chip comprising, among other limitations, a novel and unobvious limitation of "recreate the clock signal and obtain data from the double data rate data signal" structurally and functionally interconnected with other limitations in the manner as cited in claim.

Claim 27 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed interface chip to chip comprising, among other limitations, a novel and unobvious limitation of "a third reference level at a third edge of the clock signal to indicate consecutive logic highs in the data stream; and driving the signal to a fourth reference level at a fourth edge of the clock signal to indicate consecutive logic lows in the data stream" structurally and functionally interconnected with other limitations in the manner as cited in claims 28-31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
